NEW YORK STATE CANALWAY
WATER TRAIL GUIDEBOOK
SECOND EDITION

Including the Erie, Cayuga-Seneca, Champlain and Oswego Canals
ACKNOWLEDGMENTS

The NYS Canalway Water Trail Guidebook & Map Set, Second Edition, was developed by the Erie Canalway National Heritage Corridor and its not-for-profit partner the Erie Canalway Heritage Fund, Inc., with key technical support from the National Park Service Rivers, Trails and Conservation Assistance Program (RTCA).

Generous financial assistance was provided by: Recreational Trails Program from the Federal Highway Administration and NYS Office of Parks, Recreation and Historic Preservation (OPRHP); NYS Department of State (DOS) under Title II of the Environmental Protection Fund; Montgomery County; NYS Canal Corporation; Brookfield Renewable; NRS; Placid Boatworks; and Werner Paddles; and many individual donors.

Technical support and guidance was provided by members of the New York State Canalway Water Trail Advisory Committee: Karl Beard; Fred Bonn (NYS OPRHP); Mike Cavanaugh (American Canoe Association); Paul Comstock (Paul Comstock Partners and Erie Canalway Board Member); Sasha del Peral (NYS Canal Corporation); Kris Fitzgerald (2k Design); Scott Keller (Maurice D. Hinchey Hudson River Valley Greenway/Hudson River Valley National Heritage Area); Alex Kuttesch (Montgomery County); Donna Larkin (Upstate Kayak Rentals); Duncan Hay (NPS); and Mona Kulkarni Caron, Jean Mackay, and Bob Radliff (Erie Canalway National Heritage Corridor).

A special thank you to Sara Catalano, Deborah and Paul Kidder, Jeremy Koscis, Beth Walker, Mark Wells, and all Water Trail Stewards who provided extraordinary feedback for the new edition.

NYS CANALWAY WATER TRAIL DISCLAIMER

Your utilization of these materials and/or use of the NYS Canalway Water Trail acknowledges that you are participating at your own risk. If you paddle with minor child(ren), you acknowledge that the risks apply to them as well, and you will take any necessary precautions to keep them safe. Paddling and related activities can be unpredictable and/or dangerous.

Paddlers risk injury and even death from drowning, hypothermia, and other hazards. These materials do not replace proper planning or instruction by a qualified instructor, nor do they replace the skill, proper equipment, experience, and judgment that every paddler needs. Be sure to read and follow all safety suggestions. By paddling on the NYS Canal System, you understand that there are risks including but not limited to physical injury, pain, and temporary or permanent disability which may arise from your or others’ actions, inactions, or negligence or the condition of the activity’s location. By participating, you acknowledge and agree the Erie Canalway Heritage Fund, Inc. and its affiliates shall not be liable for any loss or damage of whatever nature (direct, indirect, consequential or other) that may arise as a result of your participation or that of any minor child(ren) under your care in this or any other activities.
ERIE CANALWAY NATIONAL HERITAGE CORRIDOR

The New York State Canal System’s exceptional scenery history, culture, and natural resources earned the 524-mile waterway and the communities along its shores Congressional designation as the Erie Canalway National Heritage Corridor in 2000. The waterway was designated a National Historic Landmark in 2016. The NYS Canalway Water Trail was designated a National Recreation Trail in 2022.

Many partners work together to preserve the best of the past, while ensuring a vibrant future along this legendary waterway.

The Erie Canalway National Heritage Corridor and Erie Canalway Heritage Fund, Inc. preserve our extraordinary canal heritage, promote the Corridor as a world-class tourism destination, and foster vibrant communities connected by more than 500 miles of historic waterway. These organizations work in partnership with the National Park Service, New York State agencies, non-profit organizations, local residents, and more than 200 communities across the full expanse of upstate New York.

NEW YORK STATE CANAL CORPORATION

The New York State Canal Corporation operates and maintains the New York State Canal System. A subsidiary of the New York Power Authority, the NYS Canal Corporation oversees tourism promotion; renewable power generation; public, agricultural and industrial water supplies; commercial shipping; and recreational activities along the canals. It also oversees management of the Erie Canalway Trail, a 365-mile multi-use trail from Buffalo to Albany that attracts more than 1.5 million pedestrians, bicyclists, and cross-country skiers annually. The NYS Canal Corporation also works collaboratively with community partners to improve waterway access and services, sponsor major events, and honor the historic legacy of the Erie Canal and connecting waterways.

canals.ny.gov

THE NYS CANAL SYSTEM SUPPORTS

$7.5 BILLION +
annually in economic activity, fostering sustainable economic development throughout the canal corridor.

NEARLY
80%
of Upstate New York’s population lives within 25 miles of the Erie Canal.

New York State is celebrating the bicentennial of canal construction and opening from 2017 to 2025. Watch for special events, lectures, and tours marking significant anniversaries.

HELP US IMPROVE THE PADDLING EXPERIENCE

The NYS Canalway Water Trail Guidebook and Map Set are living documents that will improve with feedback from paddlers like you. If you have suggestions for improvement, find an error, or simply want to share your favorite paddling spot or trip, we welcome you to contact us at paddler@eriecanalway.org. We will incorporate your ideas and revisions into future editions.
H
aving lived our lives in central New
York, the Erie Canal has always been
quietly present. We had a family
summer home on Oneida Lake, took trips to
the Erie Canal Museum, and made history
projects of little boats being towed down blue
cellophane water. We rode bikes along the
towpath and sang “I’ve got a mule and her
name is Sal” while crossing canal bridges in
the family car. We often took the canal’s
presence—and purpose—for granted.

We have been water people for generations,
always looking for new places to explore. The
Erie Canal and the NYS Canal System, embed-
ded in our minds as “history,” was patiently
waiting! The discovery of a canal launch close
to home began a re-envisioning of this famous
waterway. Kayak day trips on the canal led to a
spontaneous decision in 2018 to paddle its
entirety as a mother-daughter team. Over the
winter we began planning, scouring Google
maps for launch sites and places to explore. We
mapped and remapped the segments of our
trip. Excitement mounted. Little did we know
we were launching the trip of a lifetime with
unanticipated surprises and personal growth.

In 2019, we discovered this guidebook, full
of detailed maps and helpful hints. We poured
over each page, excited to find that it thoroughly
answered questions about launch sites, ramp
availability, and more. Anyone who has tried to
find this information for themselves will under-
stand what an enormous project and treasure
the NYS Canalway Water Trail Guidebook &
Map Set really is.

It took two and a half years to complete
our journey from Buffalo to Waterford. We
documented our trips on Instagram as
#twogalsonthecanal and soon built a connection
to other paddlers and places we visited. Each
winter we revisited our pictures, reflecting
on lessons learned about the canal, canal
communities, and ourselves.

The canal is different experienced from the
water and is unique from season to season.
There are hidden waterfalls, wildlife, and
colorful flowers. The Lockport gorge drips with
lilac trees in the spring. Wild apples hang
within reach in Palmyra. Juvenile bald eagles
keep a playful eye in Montezuma, and the
Mohawk River and Waterford Flight of Locks
are breathtaking in the fall. Seeing New York
State from the water brought clarity about how
this waterway connects the communities it flows
through and how its history is creating its future.

Let this new edition be your inspiration and
connection as it was ours. In its pages you will
find detailed maps and information on launches,
amenities, water safety, navigating locks, day
trips, events, recreation, historical tidbits and
much more. As you explore, we encourage
you to allow time to get to know the waterway
and its surrounding communities. Find the
farmer’s markets, ice cream shops, and historic
places. Return during different seasons to detour
down meandering creeks, see the eagles soar,
and honor the land and water. Our trip on the
Erie Canal helped us to grow as paddlers and
individuals. Respectful use of the canal as a
recreational waterway will help our communities
grow and ensure this historical corridor is a
paddling destination for all to enjoy!

Happy paddling!

WELCOME

BY SARA CATALANO AND BETH WALKER, TWO GALS ON THE CANAL
ABOUT THIS GUIDE

This guidebook contains general information about paddling on the canals, safety on the water, and visiting sites along the way. The main section is a mile-by-mile guide with maps and photos.

Mile by Mile

The mile-by-mile descriptions of sites along the NYS Canal System include the Erie, Cayuga-Seneca, Champlain and Oswego canals.

• NUTS AND BOLTS
  Each site description provides information paddlers need to plan enjoyable trips, such as access points, parking, restrooms, and visitor information. Water trail sites are listed in bold face type and are highlighted on maps near the site listing. Launches are identified with an icon.

• SITES ALONG THE WAY
  Locks and other canal structures, ports and towns, access sites, canal attractions, heritage sites, and other places of interest are also included. Distances are listed in statute miles. Coordinates are latitude/longitude (WGS 84). Most of the places described are on the canal system or within about one-half mile of the water. Paddlecraft rentals and sales, outfitters, waterway cruises, and camping and lodging options are shown in sidebars. Half the fun of paddling is what you find on shore. This guide includes many historic sites of interest, but does not include the many great places to eat, drink, and shop. Ice cream and coffee shops, restaurants, breweries, wineries, farm stands, and other recreational opportunities can be found in every canal community. County Tourism offices, listed on pages 24-25, can help you plan your trip.

• SAFETY INFORMATION
  Hazards and important safety information appear in PADDLING NOTES that accompany the site listings. Also check the NYS Canal Corporation’s “Notices and Alerts” webpage and sign up for “Notice to Mariners” before heading out: canals.ny.gov/wwwapps/tas/notices

• NORTH, SOUTH, EAST, WEST
  For the purpose of this guidebook the banks of the Erie Canal and the Cayuga-Seneca Canal are described as being on the north or south side, even when the compass direction might be different. Similarly, the banks of the Oswego Canal and the Champlain Canal are described as being west or east side.

• MAPS
  Map scales vary so check each scale to gauge distances between sites and points of reference. In most cases distances can be calculated using the mileage marker with the site listing.

THE MAP SYMBOL KEY IS LOCATED AT THE BEGINNING OF THE MILE-BY-MILE LISTINGS FOR EACH OF THE FOUR CANALS.
The NYS Canalway Water Trail is comprised of over 450 miles of canals and interconnected lakes and rivers with more than 150 public access points for paddlers. It follows the NYS Canal System across the full expanse of upstate New York flowing through time and history and connecting magnificent scenery and remarkable communities, many of which have been welcoming canal travelers for 200 years. It was designated a National Water Trail in 2022.

Among the things that makes the NYS Canalway Water Trail distinct from other water trails is the nature of the canal itself with its wealth of places to visit and sights to see. Paddlers navigate century-old locks, pass stunning stone aqueducts used to carry boats over rivers and streams in the 1800s; paddle alongside tugboats and cruisers; experience narrow flatwater stretches and wider river segments. For a constructed waterway, the canal is surprisingly serene and natural. Paddlers can expect to see a diversity of birds and wildlife, unique geology, and varying terrain.

This guidebook will introduce you to its many treasures. It will help you get on the water for a few hours or an entire day, or to plan an overnight trip or longer excursions within the canal corridor. Enjoy and paddle on!

GET CONNECTED @nyscanalwaywatertrail
Join the NYS Canalway Water Trail Facebook group to connect with other paddlers, ask questions, and share your experiences.
NYS CANALWAY WATER TRAIL RESOURCES

Signage
NYS Canalway Water Trail signs are located at more than 150 access sites to identify safe launches and take-out locations and help paddlers confirm the route. Signs face both inland and the water.

NYcanalmap.com
NYcanalmap.com is an online resource to assist users with trip planning, mileage tracking, and identifying paddling access sites, hazards, places of interest, national and state parks, and other amenities along the water and land trails.

Hand-Launch Facility Design Guide
In recent years, the NYS Canal System has experienced a dramatic increase in use of kayaks, canoes and stand-up paddleboards. In response, canalside communities, businesses and groups are building and upgrading launch sites and providing facilities for paddlers.

Erie Canalway developed the NYS Canal System Hand-Launch Facility Design Guide to help communities and organizations plan and design launches and facilities for hand-launch watercraft. The design guide includes standards and guidelines developed for structures, bank and channel features, and hydrologic characteristics that are unique to the NYS Canal System. The guide can be used for those who want to add a new access site or upgrade an existing one. The guide is available for free download at: eriecanalway.org/watertrail

Stewardship Program
The Erie Canalway National Heritage Corridor manages the NYS Canalway Water Trail Stewardship Program. Volunteer stewards perform light maintenance at launch sites and on the water, observe and report issues, and act as friendly ambassadors from May 1 to October 31.

Individuals, families, community groups, and organizations may adopt a section of the Water Trail. Stewards volunteer for a minimum of four hours per month and sections range in length of 8 to 12 miles and include 2 to 5 launch sites. Find out more at eriecanalway.org/watertrail/stewardship.

Guide to Planning a Paddling Event
Paddling events provide opportunities to explore this scenic and recreational waterway for both novice and experienced paddlers. Our Guide to Planning a Paddling Event can help organizers create a successful group paddling event. It’s free to download at: eriecanalway.org/watertrail.
A BRIEF HISTORY OF NEW YORK’S CANALS

New York has long been a state of big ideas and the kind of can-do spirit that turns them into reality. Credit for this entrepreneurial attitude is due, in part, to construction of the Erie Canal. Built between 1817 and 1825, the original Erie Canal traversed 363 miles from Albany to Buffalo. It was the longest artificial waterway and the greatest public works project in North America.

The canal put New York on the map as the Empire State—the leader in population, industry, and economic strength. Equally important, the Erie Canal solidified these central elements of America’s national identity: vision, determination, ingenuity, and hard work.

For eight years during construction, surveyors and laborers cut through fields, forests, rocky cliffs, and swamps; crossed rivers on aqueducts; and overcame hills with 83 lift locks. Upon completion, the Erie Canal and a system of connecting waterways fulfilled Governor DeWitt Clinton’s prophecy of making New York America’s preeminent state, populated border-to-border and generating wealth for its people.

People and new ideas flowed into the many new cities, towns and villages sprouting up along the canal. Social reform movements like abolitionism and women’s suffrage, Utopian communities, and various religious movements thrived in the canal corridor. The Erie Canal carried more westbound immigrants than any other trans-Appalachian canal. These newcomers infused the nation with different languages, customs, practices, and religions.

In 2000, the United States Congress recognized the Erie Canal’s significance to our nation by establishing the Erie Canalway National Heritage Corridor. The 524-mile corridor threads more than 200 diverse communities connected by a waterway that changed not just the landscape of the state, but also our nation and its history. In 2016, the NYS Canal System became a National Historic Landmark.
WHAT'S IN A NAME?
As you read this guide, you’ll see references to the three main eras of the Erie Canal:

• **1825–CLINTON’S DITCH**
  This was the original Erie Canal dug between 1817 and 1825.

• **1862–ENLARGED ERIE CANAL**
  If you see an old stone lock, canal wall, or aqueduct, it likely dates to the Enlarged Erie, a period from 1836 to 1862 when the canal was widened and deepened to accommodate more and bigger boats.

• **1918–BARGE CANAL**
  The structures and channels of the Erie, Champlain, Oswego, and Cayuga-Seneca canals operate today largely as they did when the canals were enlarged between 1905 and 1918. Renamed the NYS Barge Canal to reflect commercial shipping, the word “barge” is used infrequently today and the canals are now collectively known as the NYS Canal System.

---

The New York State Canal System Today

The NYS Canal System has been in continuous operation since 1825, longer than any other constructed transportation system on the North American continent. Since its grand opening, the canal has been enlarged three times to accommodate larger boats and more traffic. Changes were made to the route and to canal structures like locks and bridges each time.

Today, navigable portions of the system include:

• **Erie Canal**, which connects the Hudson River to the Niagara River, 339 miles to the west;

• **Champlain Canal**, connecting Lake Champlain to the Erie Canal and tidal portion of the Hudson River 62 miles south;

• **Oswego Canal**, descending along the Oswego River from the Erie Canal to Lake Ontario, 23 miles north;

• **Cayuga-Seneca Canal**, a 17-mile canal that connects the Erie Canal to New York’s two largest Finger Lakes, each about 38 miles long.

• There are also short navigable branches that connect the Erie Canal to downtown Syracuse and Rochester.

The system is maintained and operated by the NYS Canal Corporation, a subsidiary of the New York Power Authority.
PADDLING ON THE CANAL SYSTEM

Canal Season and Hours
The canals are typically open from May through October. Opening and closing dates vary from year to year, depending on conditions. The standard hours of operation are 7 a.m. to 5 p.m. Some locks and lift bridges have extended hours until 10 p.m. from mid-May to mid-September. Check ahead for current conditions and any temporary closures at canals.ny.gov for current conditions and any temporary closures.

Canal Features and Structures
The NYS Canal System includes a number of unique and historic structures used to regulate the flow of water and enable boats to transit changing elevations. The system is remarkable in its span, scope and historical integrity. Visit eriecanaway.org/resources/NHL for more information.

- **GUARD GATES:** These isolate sections of the canal in case of emergency, such as a break in a canal wall, accident, or extreme high water. Guard gates also allow sections of the canal to be drained for maintenance and winter freeze protection.

- **POWER HOUSES AND GATE CABINETS:** Most locks have distinctive white buildings on site where electricity was generated to power lock gates and valves. There are also blue-and-gold cabinets that display the number of the lock and house the motors and gearing that operate its valves and gates.

- **SHORELINE AND WALLS:** To keep the banks of the canal system from eroding, many parts are lined with rip-rap, a facing of layered rocks. Some sections are lined with vertical concrete walls. Paddlers should use designated launch and landing sites in these areas, rather than attempt to scramble up steep walls.

- **LOCKS:** There are 57 locks on New York’s canal system, including 35 on the Erie Canal, 11 on the Champlain Canal, seven on the Oswego Canal, and four on the Cayuga-Seneca Canal.

- **LIFT BRIDGES:** Fifteen lift bridges built between 1905 and 1918 still carry traffic over the Erie Canal in western New York. Stairs and walkways allow pedestrians to cross while the bridge is up.

- **MOVABLE DAMS:** There are eight dams between Fort Plain and Schenectady that regulate water flow on the Mohawk River.

There are a number of fixed dams on the canal as well. All are clearly marked. Stay away from all dams while paddling.
WATCH FOR WORK VESSELS

As you paddle the NYS Canal System, you’re likely to see distinctive blue and yellow tugboats and other workboats doing maintenance work to keep the canals safe. Several of these vessels were built prior to 1940. Thanks to the diligence of generations of canal captains, engineers, and deck hands, these vessels are still at work, brass and paint still gleaming.

Canal Notices, Alerts, and Mileage

The NYS Canal Corporation issues “Notices to Mariners” as needed, including openings/closures, water levels, construction, hazards, and other elements affecting navigation. These are posted on the website; notices and alerts are available by email and text message. For more information or to sign up for the messages, go to canals.ny.gov or follow @NYSCanalCorp on Twitter.

Also available on page 290 and the NYS Canal Corporation website is a “Profile and Mileage Table” for the NYS Canal System. It shows distances between many points and illustrates how much you will ascend or descend through a series of locks.
Paddling Through a Lock

Going through locks is one of the special experiences of traveling along the canal. The locks are 310 feet long and 45 feet wide, with massive steel gates at either end. Lifts range from six feet to more than 40. From a canoe, kayak, or rowboat, floating into this huge steel and cement structure can be a bit daunting at first—but it's also exciting. Stand up paddleboards (SUPs) are allowed on the canal system but are not allowed to lock through. Lock operators are on hand to recommend the safest place to tie-up, answer questions, and assist if needed.

Here's what to do:

1. **ALERT THE LOCK OPERATOR.**
   Don’t assume that the operator will see you coming. Alert them by calling or signaling as you approach. Lock telephone numbers are listed throughout this guide. In places with poor cell coverage, use three blasts of a loud whistle or horn to alert the operator. Canal lock and lift bridge operators monitor and respond to Channel 13, if you have a portable VHF marine band radio.

2. **WAIT FOR THE GREEN LIGHT.**
   Each lock has a green and red traffic light at either end. Wait for the green light for permission to enter and exit the lock.

3. **PADDLE INTO THE LOCK CHAMBER.**
   Position yourself alongside the lock wall as directed by the lock operator.

4. **FOLLOW DIRECTIONS OF THE LOCK OPERATOR.**
   You will be directed to hold on to vertical ropes or glide rails on the lock walls as the chamber fills or empties. Do not tie your boat to the drop line. Some boaters opt for gloves because the drop ropes and rails can be slimy. The sensation of rising or falling water is very gentle. You will be in the lock for about 15 minutes.

5. **STAY CLEAR OF LOCK GATES AS THEY OPEN.**
   Don’t rush to exit the lock. Lock operators will not see you if you get pinned behind an opening gate. When the lock gates open, paddle out slowly, taking care to avoid other boats.

6. **PAY ATTENTION AS YOU EXIT.**
   Some locks have adjacent dams and spillways that produce unexpected cross-currents downstream. Get stable before you leave the chamber.

**TIP:** Before you launch, make a float plan that includes the phone numbers of the locks you will pass through. (See page 21.)

**NOTE:** No permits or fees are required for locking through with a non-commercial vessel, including kayak, canoe, and rowboat.

**FOR A SIMPLE VIDEO GUIDE TO LOCKING:**
[canals.ny.gov/navinfo]
Other Things to Know

**RIGHT-OF-WAY**

Paddlers share the canal system with commercial vessels, tour boats, motorboats, and personal watercraft (jet skis). **Commercial vessels have the right of way.** Stay well clear—they move a lot faster than you expect and can produce big wakes. Rowing shells and organized events also take precedence. Stay clear.

Paddlers should move to the right when facing oncoming boats and when being overtaken. Sometimes it’s safest to move outside the marked channel to allow big boats to pass.

**BUOYS AND NAVIGATIONAL MARKERS**

Red and green buoys and fixed markers line the edge of the 12-feet deep navigation channel. Buoys are numbered sequentially (even for red, odd for green). Red buoys mark the north side of the channel on the Erie and Cayuga-Seneca canals and the east side on the Oswego and Champlain canals. Things can be a bit confusing where the Cayuga-Seneca and Oswego branch off from the Erie. Pay attention to the maps and guidebook descriptions in those two areas.

**CURRENTS**

Although it appears placid on the surface there is a noticeable current in most segments of the canal system. While flows in the Erie west of Rochester are fairly consistent, they can fluctuate widely in canalized rivers that make up about two-thirds of the system. The Seneca, Oswego, Oneida, Mohawk, and Hudson rivers drain very large areas of New York State. Some high flow events in those sections are produced by storms far from the canal.

This guide was compiled in a generally downstream direction (west to east on the Erie, north to south on the Champlain, south to north on the Oswego). End-to-end boaters on the Erie and Champlain will need to do some upstream paddling in order to get over drainage divides. If you want to start and end your trip at the same launch site it’s usually a good idea to paddle upstream on the first leg so you have the current helping your return.

**PREVENT THE SPREAD OF INVASIVE SPECIES**

Boats, trailers, and other equipment can spread invasive species from one waterbody to another unless properly cleaned after use. NYS Department of Environmental Conservation (DEC) regulations prohibit boats from launching or leaving DEC launch sites without first draining and cleaning visible plant and animal material from the boat, trailer, and other equipment. Follow these DEC guidelines to prevent the spread of invasive species:

1. Inspect your boat, trailer, and other equipment and remove any visible mud, plants, fish, or animals before transporting equipment.
2. Eliminate all water from equipment before transporting.
3. Clean, drain and dry anything that comes into contact with the water, including boats, trailers, and all other boating and fishing equipment. Paddlers should be particularly aware of areas that are difficult to inspect and dry.
4. Disinfect if you cannot dry equipment.
5. Never release plants, fish or animals into a body of water unless they came out of that body of water.
BE SAFE ON THE WATER

• **Always wear a personal flotation device (PFD) when you are on the water.** The U.S. Coast Guard requires a life jacket/PFD for each person on board. Canal regulations require that the PFD be worn when passing through a lock. In New York State, it is required for all boaters under age 12 and for all paddlers from November 1 to May 1.

• **Learn to swim.** Take a lifesaving course.

• **Be a better paddler by taking a few lessons.** Learn rescues and self-rescues from a competent instructor.

• **Check the NYS Canal Corporation “Notices and Alerts” website** for current information about the segment you plan to paddle: canals.ny.gov/wwwapps/tas/notices

• **Check the weather forecast before leaving shore and during your trip.** Start with the weather report page for the National Oceanographic and Atmospheric Administration (NOAA) at weather.gov or use the free NOAA app.

• **If you get caught in a storm:** Paddle to shore and hug the shoreline until reaching a safe place to exit the water. Lightning is a major hazard for boaters. Do not pull over and tie up to the tallest isolated tree. A safer strategy is to keep paddling, briefly, until you find a safe take-out place, preferably one with shelter nearby.

• **Identify launch and exit sites.** Consult the mile-by-mile information in this guide and on the navigational maps to identify places you can exit the water if needed during your trip. Carry the waterproof map or nautical chart with the exit points marked.

• **Bring your cell phone.** Keep it in a waterproof case, dry bag, or zip-lock plastic bag. Secure it to your boat or life jacket.

• **File a float plan with someone on shore.** See page 21 for details.

• **Carry identification and emergency contact information.**

• **Carry drinking water and snacks,** such as energy bars, especially for a long paddle.

• **Protect yourself from the sun.** Wear sunglasses, a hat, and sunscreen.

• **Be prepared for a variety of conditions.** Wear water shoes or old sneakers. Pack bug repellant and a small first aid kit, with materials to deal with blisters. Have dry clothing waiting for you in your car on return. If you’re paddling a long distance, take dry clothes on board in a waterproof bag.

• **Use the restroom before you leave.** In a waterproof bag, carry toilet paper and some sanitary wipes, plus another sealable plastic bag for waste paper. Carry out everything you carry in. Leave no trace.

• **Bring a bailer or pump** to bail out the boat.

• **Bring enough line** to tie up both the stern and the bow of the boat along the shore or at a dock should a storm approach and to allow for a tow, if necessary.

• **Paddle with others whenever possible.**

• **Do not use alcohol or recreational drugs while paddling.**

**In an emergency, call 911 or request assistance using channel 16 on a VHF radio.**
Make Boating Safety a priority

- Always wear a properly sized PFD
- Stay away from dams, buoys and barriers
- Be cautious near hydropower assets, water levels can change quickly
- Respect all signs and warning signals
- Tell someone your plans, destination, and timing
- Use designated launch sites
- Boat smart, no drinking and boating
- Leave no trace: carry in/carry out
- Before heading out, check the weather forecast and canals.ny.gov for current conditions

brookfieldrenewable.com
THINGS TO SEE AND DO

In addition to great paddling, there is a lot more to do in the canal corridor. Here is a sampling; you will find additional details in the mile-by-mile information and in “Places of Interest Off the Water” highlighted throughout the guidebook. Extensive online resources are available at eriecanalway.org.

Taste History Along New York’s Canals

In the 1800s the Erie Canal carried New York’s rich agricultural products to the nation. Today agriculture remains an important part of life along the canal corridor, and most paddling journeys would not be complete without sampling the local fare. Visit the canal corridor’s many microbreweries, wineries, farmers markets, farm stands, ice cream parlors, local shops and ethnic restaurants for a great taste of the many flavors of the region.

- Inquire about local market days in the towns you visit or find locations and dates at localharvest.org or agriculture.ny.gov.
- Find pick-your-own orchards, farm tours, apple festivals, and more apple fun along the canal system at applesfromNY.com. To find farm cideries producing hard cider, check, NYcider.com.
- For information about wineries, visit fingerlakeswinecountry.com.
- Check out breweries with the Empire State Trail Brewery Passport (thinknydrinkny.com) and New York Craft Beer App (newyorkcraftbeer.com). Regional trails include the Adirondack Craft Beverage Trail (adkcraftbev.com), the Finger Lakes Beer Trail (fingerlakesbeertrail.com), the Heart of New York Craft Beverage Trail (brewcentralny.com), and the Rochester/Finger Lakes Craft Beverage Trail (rocflxcraftbevtrail.com).
- You can also discover locally grown and made food and drink while getting to and from your travel destination at the Taste NY Markets found at three travel plazas in the canal corridor:
  - **Chittenango Travel Plaza**
    New York State Thruway I-90 Westbound Milepost 266
    Chittenango, NY 13037
  - **Finger Lakes Welcome Center**

Canal Communities

Be sure to spend time in the villages, towns, and cities along the canal. You’ll discover communities that showcase their canal heritage through waterfront festivals, historical murals, walking tours, and preservation initiatives. Look for evidence of New York’s canal age in the buildings and streetscapes of communities along the canal. Not only do canal towns share similarities in layout and orientation to the waterway, in most cases, their architecture reflects the prosperity that characterized upstate New York from 1825 through the end of the 19th century.
Cultural and Heritage Sites and Museums

World class museums, four national parks, national historic landmarks, historic canal sites and vessels, grand movie palaces and theaters, and a 100-mile mural trail provide a wealth of choices for exploring culture and history. Canal-themed museums share the powerful story of this waterway’s role in shaping New York and the nation. Art lovers will enjoy a wealth of local galleries, outstanding museum collections, craft festivals, and art trails. The changing light and mood of the waterway also presents excellent opportunities for photography and painting.

State Parks and Historic Sites

Within the Erie Canalway National Heritage Corridor, there are nine New York State historic sites and 24 state parks managed by the New York State Office of Parks, Recreation, and Historic Preservation (OPRHP). State parks generally have parking areas, roads, trails, docks, and restrooms. Some have recreational facilities, including beaches, swimming pools, and playgrounds.

FOR MORE INFORMATION about locations, fees, hours, and facilities, visit parks.ny.gov.

Old Erie Canal State Historic Park,
Chittenango Creek Aqueduct

Cycling the Erie Canalway Trail

Enjoy unparalleled cycling along the 360-mile Erie Canalway Trail. The paved and stone dust trail follows both active and bypassed sections of the Erie Canal from Buffalo to Albany—much of it along the canal’s former towpath. More than three-quarters of it is off-road; trail markers and wayfinding signs make the trail easy to follow and connect the off- and on-road segments. The Erie Canalway Trail forms the east-west spine of the 750-mile Empire State Trail, which also runs north-south from the Canadian border to New York City. The section from Waterford to Whitehall is also known as the Champlain Canalway Trail.

PASSPORT TO PARKS

A fun way to remember your canal journey is with the special Passport to Your National Parks program’s cancellation stamps, available free at more than 30 canal heritage sites. Find a list at eriecanalway.org/explore/culture-heritage.
**Fishing**

As a gateway to New York’s waterways, the canal offers access to a wide range of fishing opportunities—from small streams to the Great Lakes. Many anglers seek out areas near the canal system’s locks, where fish often congregate. Common catches include: walleye, northern pike, small and large mouth bass, panfish, and carp. New York State requires everyone above the age of 16 to have a license to fish in New York’s freshwaters. The NYS DEC maintains a number of fishing access sites along the canal that are also boat launches—these sites are included in this book. Find details: [dec.ny.gov/outdoor/fishing.html](http://dec.ny.gov/outdoor/fishing.html)

**Birdwatching**

The Erie Canalway National Heritage Corridor’s water, wetlands, and rich woodlands are home to an impressive variety of birds. Migratory songbirds and waterfowl use the corridor on their yearly travels and many nest along its shores. Swallows, herons, and waterfowl are common. Watch for bald eagles and osprey perched along the shoreline or diving for fish.

**FOR MORE INFORMATION** visit [ibirdny.org](http://ibirdny.org) and [ebird.org](http://ebird.org). Both are excellent sources of up-to-date information, including where to see and learn more about birds.

**MORE INFORMATION** for exploring all there is to see and do along the canalway, including suggested itineraries, can be found at [eriecanalway.org](http://eriecanalway.org).

**Festivals and Events**

Communities throughout the canal corridor celebrate their canal connection with annual events, including fairs, festivals, concerts, fireworks, boat floats, races, and more. These events are fun, great for families, and usually free. They make a great destination for a day trip or overnight paddle. Find a calendar of events at [eriecanalway.org](http://eriecanalway.org).
PREPARING FOR YOUR TRIP

Know Your Skill Level

The canal system presents opportunities suited to beginners through advanced paddlers. Novices and families with children will find protected sections of the dug canal with flat water, particularly from Tonawanda to Lyons and along the Cayuga-Seneca Canal. More experience is needed to paddle river and lake sections where currents and wind affect conditions on the water. Plan your destination and time on the water according to your skills.

Trip Duration

How far can you paddle in an hour, an afternoon, a day, a weekend? On average, most adults paddle about 2.5 to 3 miles per hour when paddling in open water, without any significant current or wind.

Build your float plan around the slowest person in your group. Also account for going through locks, which take about 15 to 20 minutes each.

Paddlers going from end to end on the Erie Canal typically plan 2.5 to 3 weeks to make the 339-mile journey. For day or weekend trips, choose mileage that will be comfortable for you to cover in a day—and leave time to stop and explore on land.

Lastly, give serendipity its due. You might discover a lovely place to stop for lunch or a historic site you can visit.

ADAPTIVE PADDLING

Paddling on the NYS Canal System is an increasingly inclusive sport. Many municipal and NYS DEC docks have been improved to allow handicapped access.

Rochester Accessible Adventures (RAA) makes recreation on the canal system simple and inexpensive for people with disabilities and their families and friends. In 2016, RAA formed a partnership with the Erie Canal Boat Company (ECBC) in Fairport and developed the Adaptive Paddling and Cycling Center (APACC). In addition to experienced staff and volunteers, the center at ECBC has a dock-mounted Hoyer lift, floating docks low to the water, and a ramp entry that opens paddling opportunities to people of all physical abilities. RAA’s free CanalPal program sends a trained volunteer out with kayakers to provide training and support.

A second site in Lockport opened at the Wide Waters Marina in 2018 and adaptive equipment rentals can be arranged with ECBC at additional locations.

# EQUIPMENT CHECKLIST

## BOAT GEAR
- Canoe, kayak, stand-up paddle-board, rowboat, or other vessel(s) suitable for the water conditions and number of people on the trip. [Do NOT overload]
- Coast Guard Approved wearable Personal Flotation Device (PFD/life vest)—required for every participant
- Whistle/horn (required)
- White light (required)

## PERSONAL GEAR
- Water bottle
- Sunscreen
- Sunglasses
- Wide-brimmed hat
- Rain gear
- Insect repellent
- Gloves (to handle lock lines)
- Knife
- First aid kit
- Cold and warm weather clothing
- Water shoes
- Quarters (coin-operated shower, laundry, parking meters, etc.)
- Credit/debit card

## ADDITIONAL BOAT GEAR
- Paddles (and a spare)
- Bailer or pump
- Bow and stern lines (painters)
- Waterproof gear storage bags
- Cable and lock (to secure boat when you go into town)

## COMMUNICATIONS AND SAFETY
- Float plan with emergency contact information (see page 21)
- Cell phone in waterproof container
- Portable VHF marine band radio (useful but not required—canal lock and bridge operators and many boaters monitor Channel 13)
- Binoculars (useful but not required) for reading buoy numbers and far-off bridge names

## SHELTER
- Tent
- Sleeping bag
- Sleeping pad

## FOOD AND COOKING
- Meals and snacks
- Portable stove
- Fuel
- Waterproof matches and/or lighter
- Water jug
- Cooking gear and utensils
- Trash bags (if you pack it in, pack it out)
Smart Paddlers know how to BE SAFE & BE SEEN

Wear your lifejacket, carry a whistle and wear bright colors. Add reflective stickers to your paddles to increase visibility.

Get your FREE reflective paddle stickers by sending this ad and a self-addressed, stamped envelope to:

NYS Office of Parks, Recreation & Historic Preservation
Attn: Marine Services Bureau Reflective Stickers
Albany, NY 12238

New York State Parks, Recreation and Historic Preservation

WearItNewYork.com
MAKE A FLOAT PLAN

A float plan will help to ensure your safety should something unexpected arise during your trip. Leave the information with a reliable person who will notify the authorities if you do not return as scheduled. If you are delayed and it is not an emergency, inform the person with your float plan to avoid an unnecessary search. Let the person know when you arrive home.

Include the following in your plan:

- Departure time and expected return time
- Names and phone numbers of all persons on the trip
- Trip route, with direction and destination(s)
- Boat description with boat color and length
- Description of your vehicle, plate number, and where it will be parked
- List of emergency safety equipment on board (flares, VHF radio)

BE SMART: Put your name and contact information in permanent marker in or on your boat in a way that easily can be seen. This will aid in tracking down a boat that has gone missing, on or off the water. Paddlers should always carry waterproof ID with emergency contact information that can ride along with you in your pocket or in your boat. Labels are available from NYS OPRHP and the US Coast Guard.

Some areas of the canals have poor or no cellular signal reception. This could affect access to 911 emergency services or other communication needs. Most canal facilities and other private businesses do have landlines should you find limited cellular service during your journey.
Accommodations

Some portions of the canal system pass through populated areas with a choice of hotels, motels, B&Bs, and other lodgings. Other parts are more sparsely populated where lodging may be scarce or far from the water. This book includes lodgings that are easily accessible from the canal. Additional options for lodging are available off the canal system. See pages 24-25 for information on tourism offices.

The NYS Canal Corporation has designated a number of Biker-Hiker-Boater campsites along the canal system. These tent-only informal campsites have space for tents, and offer potable water, portable toilets, picnic tables, and grills. Stays are limited to 48 hours. Contact the site in advance to make sure space is available. For camping space for groups larger than 10 people/four tents, contact Canal Real Property Management at (518) 449-6000 to obtain a permit.

Camping is permitted at most other canal locks on a case-by-case, first-come, first-served basis. Camping at these non-designated sites is limited to a maximum of four tents per night. Contact the Lock Operator in advance to determine if camping is permissible and where to set up. At most non-designated locks, the camping facilities are limited—drinking water and restrooms may not be available for overnight stays.

Paddlers should think ahead about overnight boat storage and security. Bring a cable lock system to anchor your boat to a tree, fence, boat rack, or your car roof rack.
