ERIE CANAL

The largest of the four canals that make up the NYS Canal System, the Erie Canal was built between 1817 and 1825 and traversed 363 miles from Albany to Buffalo. It was the longest artificial waterway and the greatest public works project in North America.

The canal put New York on the map as the Empire State—the leader in population, industry, and economic strength. It transformed New York City into the nation’s principal seaport and opened the interior of North America to settlement.

Equally important, the Erie Canal became a central element forging our national identity. Built with a combination of vision, determination, ingenuity, and hard work, the Erie Canal solidified these central elements of our American character.

It’s here you’ll find engineering marvels, historic vessels and canal sites, and lively Main Streets, along with great recreational opportunities and hundreds of festivals and events. As you travel, you’ll discover that each region has its own distinctive flavor. Visit more than one, or go “end to end” to enjoy it all.

MORE INFORMATION about exploring the canal and its history as well as supporting the preservation and heritage initiatives along the water, is available at ericanalway.org.

MORE INFORMATION about navigating the canal system, can be found at canals.ny.gov.
Explore New York’s second-largest city, one that was transformed when the Erie Canal opened in 1825. As the western terminus, Buffalo became the hub of transportation, immigration, and commerce. The Commercial Slip, where the Erie Canal joined the Buffalo River, was the principal transfer point for cargo and passengers travelling between the upper Great Lakes and the Atlantic. The city that rapidly grew up around the harbor came to be called the “Gateway to the West” and “Queen City of the Lakes.” Grain, lumber, and ore from the middle of America were moved from lake freighters to canal boats at docks and elevators along the Buffalo River. By the early 1900s, an increasing portion of the cargo moved from ships to railroad cars. The Erie Barge Canal, built from 1905 to 1918 for self-propelled vessels, shifted the point of entry from Buffalo to Tonawanda, about 14 miles downstream (north) along the Niagara River. Today, boats heading to the Erie Canal use the river between Buffalo and Tonawanda, passing through the federal lock at Black Rock on their journey.

The City of Buffalo has transformed the historic western terminus of the Erie Canal into Canalside, a vibrant and bustling combination of public open space and docks, rewatered channels, historical interpretation, recreation, outdoor entertainment, and new businesses. Launch your kayak, canoe, or stand-up paddleboard at Canalside or another public dock in the harbor area and paddle the Inner Harbor and Buffalo River. Rentals are available at the locations listed on page 33.

BUFFALO RIVER

Joseph Dart invented the steam-powered grain elevator in 1842. He built the first one on the Buffalo River to move midwestern grain from large lake freighters to canal boats for transport east on the Erie Canal. The idea caught on fast. By 1900, the winding, eight-mile Buffalo River and connecting creeks were lined with grain elevators. Today grain still comes by ship from the Midwest to Buffalo’s elevators, but it leaves on trains and trucks, not canal boats. One of the best ways to see “Elevator Alley” is from a small boat. Paddlers on the Buffalo River may encounter tugboats and the occasional long, narrow lake freighter, but rowing shells, canoes, kayaks, and small power boats are far more common today.

That smell of Cheerios emanates from the General Mills plant at the southern end of the Michigan Avenue lift bridge. Look for the fireboat Edward M. Cotter docked near the Michigan Avenue lift bridge. Launched in 1900, she is a National Historic Landmark, the oldest working fireboat in the world. She’s still an important member of the Buffalo Fire Department, fighting fires at properties that can only be reached by water.

The Buffalo River was declared dead in 1967, a victim of extensive industrial pollution and uncontrolled sewage outflow. The Clean Water Act of 1972 started a long recovery process that continues today. The Buffalo River is now a much friendlier and safer place for paddlers.

The Buffalo Blueway (buffaloblueway.com) is a program by Buffalo-Niagara Waterkeeper to develop and promote safe and accessible launch sites for paddlers along the Buffalo River. Several facilities have recently been built or significantly upgraded and more are in the works. “Go with the ‘Flo’.”
**Buffalo River—Harlem Road Fishing Access Site**  
Harlem Road (north of shopping center)  
West Seneca, NY 14224  

**FACILITIES:** Parking area with trail to bank launch near the upper limit of paddlecraft navigation on the Buffalo River. Trail from parking area and launch is 125 feet.

---

**Buffalo River—Harlem Road Fishing Access Site**  
Harlem Road (north of shopping center)  
West Seneca, NY 14224  

**FACILITIES:** Parking area with trail to bank launch near the upper limit of paddlecraft navigation on the Buffalo River. Trail from parking area and launch is 125 feet.

**Canalside Buffalo**
44 Prime Street
Buffalo, NY 14202
(716) 436-7100
buffalowaterfront.com

**FACILITIES:** Electric, water, restrooms, low dock, over 1,000 feet of berthing space. Food vendors, restaurants, shops, paddlecraft rentals, Explore & More Children’s Museum, ships of the Buffalo & Erie County Naval & Military Park, and a branch of the Buffalo Maritime Center all cluster around “Commercial Slip,” and branch channels that formed the connection between the Erie Canal and the Great Lakes from 1825 through 1918. Long forgotten but redeveloped over the past 20 years, Canalside now hosts an active schedule of events year-round.
First lit in 1833 and now listed on the National Register of Historic Places, it is located at the mouth of the Buffalo River at the north entrance to Buffalo Harbor.

**Buffalo Main Light**  
1 Fuhrmann Boulevard  
Buffalo, NY 14203  
(716) 264-1707  
buffalolight.org

Once crowded with canal boats and lake freighters, Erie Basin was redeveloped during the 1970s as part of waterfront revitalization, it is now a popular destination, with a casual restaurant, ice cream stand, community flower garden, historic markers, and a viewing platform at the northern tip of the breakwater.

**Erie Basin Marina**  
329 Erie Street  
Buffalo, NY 14202  
(716) 851-5238  
eriebasinmarina.org

**FACILITIES:** Electric, wi-fi, water, restrooms, parking. Concrete ramp near the entrance.
Erie Canal—Buffalo

NIAGARA RIVER

The Niagara River flows north from Lake Erie to Lake Ontario. It drops 327’ in 37 miles between the lakes, most of that at Niagara Falls and the rapids immediately below. The river marks the border between the U.S. and Canada. The entrance to the Erie Canal at Tonawanda is about twelve miles downstream (north) of Buffalo. The falls are about ten miles below that.

From 1825 to 1915, the Erie Canal ran from Buffalo to Tonawanda in a separate channel along the western bank of the Niagara River. Today, the shipping channel runs in the river itself, with a short canal and the federal lock at Black Rock to help boats pass the rapids under the Peace Bridge.

Paddlers heading downstream toward the Erie Canal have two options: they can hug the eastern (U.S.) shore and transit the Black Rock Lock, or they can run the river. The current in this area is swift and strong, even when the surface appears flat and calm. The area between Buffalo and the Erie Canal entrance is heavily used by commercial traffic and powerboats. Know your abilities before attempting to paddle on the Niagara, keep a sharp eye on the weather, and exercise extreme caution at all times.

If you choose to run the river, hug the east bank and stay well east of Strawberry Island, Frog Island, Motor Island (also known as Pirates Island), and Little Beaver Island. The river is split by Grand Island, with Niagara Falls on the western branch not far beyond the northern (downstream) tip of the island. Stay to the east—you don’t want to paddle against that current.

E Mile 350.8 42.88708 -78.89016

Ralph C. Wilson Centennial Park
(LaSalle Park)
AmVets Drive
Buffalo, NY 14201
(716) 851-5553

FACILITIES: Restrooms, picnic tables, picnic shelters, playing fields, fenced dog park.

The 77-acre park is Buffalo’s largest waterfront park. It was reclaimed from a landfill during the 1930s, renamed in 2021, and is currently being redeveloped with major funding from the estate of Ralph C. Wilson, owner of the Buffalo Bills football team. A canoe and kayak launch with parking are planned for the southern (upstream) end of the park.

Bird Island Pier

A two-mile long stone and concrete structure, first built in 1860, that separates Lake Erie and the Niagara River from the calmer Black Rock Channel. The narrow walkway on top is a popular route for walkers, runners, and anglers and a good place to view sunsets over Lake Erie. Raised sections every few hundred feet provide places to escape rising waters when winds out of the west push up the lake’s surface in a tide-like seiche.

E Mile 350.0 42.89649 -78.89944

Colonel Francis G. Ward Pumping Station
2 Porter Avenue
Buffalo, NY 14201

The large brick building with arch-topped windows, red roof, and smokestack on the east bank of the Black Rock Channel was built in 1914 to pump drinking water from Niagara River’s Emerald Channel to the growing city of Buffalo. The building still houses five massive triple-expansion pump-
ing engines although their work was taken by electric pumps, starting during the late 1930s.

</table>
| **International Railway Swing Bridge**  
The oldest bridge in Buffalo was opened in 1873 and is still in use. The bridge is 3,651 feet long; the section over the Black Rock Canal is 517 feet long. At its peak in the early 20th century, over 250 trains passed over the bridge every day. Today the bridge averages between 10 and 15 trains a day. |

<table>
<thead>
<tr>
<th>E Mile 347.1</th>
<th>42.93455  -78.90624</th>
</tr>
</thead>
</table>
| **Black Rock Lock**  
3 Dann Street  
Buffalo, NY 14207  
(716) 879-4403 |

**LIFT:** 6 feet.

**PADDLING NOTE:** Paddlers are required to yield the right-of-way to commercial vessels. Paddlers may lock through downbound on the hour and upbound on the half hour (more information at [lrb.usace.army.mil/Missions/Recreation/Black-Rock-Lock](http://lrb.usace.army.mil/Missions/Recreation/Black-Rock-Lock)).

Where’s the massive black rock that gives
this lock and surrounding neighborhoods their names? A natural landmark on the river, it was blasted away to make room for the canal. The Black Rock Lock and the Black Rock Channel provide passage for vessels to travel between Lake Erie and Tonawanda and the Erie Canal around the reefs, rapids, and fast currents of the upstream portion of the Niagara River. The Black Rock Channel extends from Buffalo Harbor to the Black Rock Lock and combined are 3.5 miles long. The lock is 650 feet long, 21.6 feet deep, and 70 feet wide. The channel and lock are operated by the U.S. Army Corps of Engineers.

**NIAGARA RIVER ISLANDS**

Past the Black Rock Lock are several islands to the west of the canal. Strawberry Island is the dividing point for the east and west branches of the Niagara River.

Further downstream (north) is a string of small islands: Frog Island, Pirates Island (also known as Motor Island), and Little Beaver Island. Along with Strawberry Island, these sites are managed as a fish and wildlife preserve and are closed to the public.

To the west of Strawberry Island is Grand Island, the largest island in the Niagara River and the fourth-largest in New York. Beaver Island State Park at the south end of the island covers 950 acres and has a half-mile sandy beach, a large marina, bike and nature trails, and picnic areas. It’s a great place to paddle along the shoreline, but **do not attempt to reach the island from the Niagara River.** Drive across the South Grand Island Bridge instead.

THE TONAWANDAS

The western terminus of today’s Erie Barge Canal is in the twin cities of Tonawanda and North Tonawanda. From the Niagara River, turn east and enter the Tonawanda Creek.

Tonawanda Creek and the Erie Canal form the border between the cities of Tonawanda, Erie County and North Tonawanda, Niagara County. Although this section of the creek is placid, Tonawanda means “swift running water” in the Seneca language, a reference to falls and rapids upstream. At the height of commerce on the Erie Canal, the Tonawandas were one of the busiest ports on the Great Lakes. Midwestern lumber was unloaded from lake freighters and transferred onto canal boats to be carried to building sites along the eastern seaboard. Woodworking industries, including boatbuilding and the manufacturing of wooden carousel horses, once thrived in the “Lumber City” of North Tonawanda.

Large private marina with 400 slips located on Tonawanda Island in the Niagara River at the mouth of the Erie Canal (Tonawanda Creek).

-----

Niagara River  43.03229 -78.88354

Bow & Stern Marine
400 River Road
North Tonawanda, NY 14120
(716) 692-2316
bowandsternmarine.com

FACILITIES: Electric, water.

Private marina. Located on the Little Niagara River between Tonawanda Island and the mainland near the mouth of the Erie Canal (Tonawanda Creek).

-----

E Mile 338.63  43.02268 -78.88144

An old New York Central Railroad swing bridge in the middle of the channel is now fixed in the open position. The vertical locating pin and support ring for rotating the bridge are well-preserved and easy to see.

PADDLING NOTE: Pass by on either side of the bridge. Do not attempt to land at or climb onto the bridge. Strong currents are possible near the bridge.
Erie Canal–The Tonawandas

**E Mile 338.58, north side  43.02247 -78.88031**

**Wardell Boat Yard**  
1 Sweeney Street  
North Tonawanda, NY 14120  
(716) 692-9428  
wardellboatyard.com

**FACILITIES:** Electric, water, restrooms, showers. Travel-lift. Private marina.

**E Mile 338.54  43.02182 -72.87998**

Bridge E249, Seymour Street (NY 265)  
There is an informal gravel beach launch under the north end of the bridge.

Bridge E248, Webster Street

**E Mile 338.33, both sides  43.02100 -78.87773**

**Tonawanda Harbor/Gateway Harbor Park**  
1 Young Street (just west of Delaware Avenue bridge)  
Tonawanda, NY 14150  
(716) 695-8520  
tonawandasgatewayharbor.com

**FACILITIES:** Electric, wi-fi, water, restrooms, showers. Kayak dock with roller launch is on the south side by the harbormaster’s office (84 Sweeney Street). Ample parking is on the south side. Food and beverage vendors are active in the park. Shops, restaurants, and historic sites are a short walk from the harbor. Steps to water level on north side allow you to take out.

Gateway Harbor Park is the largest docking facility on the NYS Canal System. It runs on both sides of the canal for about one-quarter mile from the Gateway Harbor. The docks are operated jointly by the twin cities of North Tonawanda and Tonawanda. A retired buoy boat is on display near the harbormaster’s office.

**PADDLING NOTE:** During summer events and concerts the harbor often fills with powerboats that raft together. Be cautious; larger boats may not see you in time to avoid a collision.

**E Mile 338.08  43.02097 -72.87684**

The junction with Ellicott Creek is on the south, just past the Webster Street Bridge. The Niagara Street pedestrian bridge spans the creek mouth. The Benjamin Long Homestead historic house museum is visible on the east side of the creek and can be reached from the water.

**FACILITIES:** Restrooms, nature trails and camping.

This 31-acre green space is located on the south side of Tonawanda Creek and is accessible from Orbit Road in Amherst. The facility can be booked for group camping.
Guard Gate 18, Pendleton
Open throughout the navigation season. Guard gates can be lowered in the event of emergencies and to allow sections of the channel to be isolated and drained for maintenance. During the winter, the Erie Canal from Pendleton Guard Gate to the Genesee River crossing in Rochester is usually dewatered.

Between the guard gate and Lock 35 in Lockport, a distance of about 6.5 miles, the canal passes through the “Deep Cut,” first carved through Lockport Dolomite in 1825.

**PADDLING NOTE:** Vertical rock walls preclude any boater exit between here and the Upper Lockport Terminal at mile 321.22.

Bridge E236A, SW Bypass (NY 93)
In Lockport, you’ll see how canal engineers built the impressive Lockport Flight to solve the challenge of helping boats climb the 60-foot Niagara Escarpment.

The Lockport Locks District contains a lot of canal history in a compact area. Canal Street, a bike and pedestrian walk, overlooks the canal on the north side. You’ll find shops, coffee houses, artisan ice cream, restaurants, and attractions there, as well as along Lockport’s main street.

Start your visit to Lockport at the Erie Canal Discovery Center. The interactive interpretive center showcases the history of the Erie Canal and the building of the famous “Flight of Five” Lockport Locks. From there, take a short walk to the Canalside District to see the renowned staircase of stone locks and wooden gates built in the 1800s alongside the similarly remarkable and much enlarged Locks 34 and 35, which usher boats through the Erie Canal today.

Get on the water for a narrated tour with Lockport Locks and Erie Canal Cruises (see page 61).

The annual Locktoberfest event takes place in the district at the beginning of October.
RESTORED FLIGHT OF FIVE LOCKS

To carry canal traffic up and down the 60-foot change in elevation created by the Niagara Escarpment in Lockport, canal engineers created two parallel sets of five interconnected locks. The Lockport Flight consisted of Locks 67 through 71, each with a lift of about 10 feet. The first version opened in 1825 and was enlarged in 1849 to accommodate larger boats. Today’s Barge Canal, constructed between 1905 to 1918, replaced the southern set of locks with two massive concrete chambers, Locks E35 and E34. The northern staircase of the 1849 lock chambers was retained to serve as a spillway and the principal route for canal water from here to Rochester. Efforts are underway to restore the old part of the Lockport Flight to its towpath-era appearance. Reproduction timber gates have been installed on one chamber and are operated by volunteers on weekends to demonstrate how the locks worked. Locks 69 and 70 were reopened in 2014. The long-term goal is to restore the entire “Flight of Five” to operating condition.

Lockport is the only location on the Erie Canalway National Heritage Corridor where historic manual locks and modern electro-mechanical locks operate side by side. Multiple bridges, one at the foot of each lock, cross over the chambers and are a great place to see the locks in action. The wooden boat Erie Traveler is a replica of a Durham boat, a type of flat-bottomed, double-ended vessel that plied New York's rivers before construction of the Erie Canal. Built by volunteers in Buffalo, it is 42 feet long and seven feet wide. Free weekly demonstrations showing the Flight of Five locks in operation take place every Saturday in coordination with the Lockport Community Farmer’s Market from 10 a.m. to 2 p.m.

MORE INFORMATION about things to do in the Lockport area is available from visitbuffaloniagara.com and niagarafallsusa.com.
**Lockport Upper Terminal Launch**
Prospect Street at Stevens Street
Lockport, NY 14094
(716) 434-3140

**FACILITIES:** Steep concrete ramp. Parking for 20 cars. Distance from parking about 20 feet.

The launch ramp is at the west end of the terminal wall. It can be accessed via an unpaved road leading from the intersection of Prospect and Stevens streets or from an unmarked road off West Genesee Street (NY 31).

**Locks E35 and E34, Lockport**
80 Canal Street
Lockport, NY 14094
(716) 434-3140

**LIFT:** E35 24.6 feet; E34 24.5 feet; combined lift 49.1 feet.

**FACILITIES:** A low floating dock is on the north (left) side of Lock 35 in the channel leading to the spillway.

**PADDLING NOTE:** The current near the upper end of Lock 35 can be strong as the water is pulled into a hydroelectric plant on the right and a spillway to the left. This area can also be crowded with larger boats.

Locks 35 and 34 are combined locks: the lower gates of Lock 35 are the upper gates of Lock 34. The western end of Lock 35 has double gates for safety in case of a breach. The distance from here to Lock 33 in Henrietta is about 64.2 miles.

NYS Canal Shops, Lockport
**SCHEDULE:** Varies. Call ahead for daily schedule.

**PADDLING NOTE:** Watch for boat traffic in this area. Lockport Locks and Erie Canal Cruises operate several tour boats from a base on the south bank and the NYS Canal Corporation maintenance shops are on the opposite side. Watch out for cross-currents between the tour boat dock and the Exchange Street lift bridge. A waste weir draws water from the south side of the canal and drops it into Eighteen Mile Creek.

**Bridge E230, Exchange Street Lift Bridge**

**Bridge E229, Adams Street Lift Bridge**
Built in 1918, this bridge was closed to traffic in 2014 and is now kept open; clearance is 16 feet 6 inches.

**Bridge E228, Lake Avenue/Matt Murphy Way**
The canal widens to a widewater area east of this bridge.

**Wide Waters Marina/Nelson C. Goehle Public Marina**
768 Market Street
Lockport, NY 14094
(716) 628-2134
lockportny.gov/water-activities

**FACILITIES:** Electric, water, restrooms, showers, laundry. Concrete ramp and kayak launch with roller docks. Parking for 40 cars; overnight parking allowed. Distance from parking about 20 feet.

**Bridge E226, Cold Springs Road**
The canal narrows again to its normal width just to the east of this bridge. The Lockport Town and Country Club is on both sides of the bridge on the south side.

From Lockport to Rochester, the canal runs along the edge of the Medina Escarpment. An embankment on the north side gives the impression of a waterway running high above the surrounding countryside. It can be tough to see from a canoe or kayak, but stop along the way and scramble up the north bank. You may find yourself looking over the tops of trees of orchards that stretch from the canal all the way to Lake Ontario.

**Bridge E225, Day Road**

**Bridge E224, North Canal Road (CR 77)**

**Bridge E223, Orangeport Road**

**Gasport Landing**
Telegraph Road just to the west of the lift bridge Gasport, NY 14067
gasportnewyork.blogspot.com

**FACILITIES:** The terminal wall is not suitable for paddlers. Parking for five cars; free overnight parking. Shops and restaurants are a short walk away.
Gasport is the smallest of all the canal towns, with a population of barely over 1,000 people. The town gets its name from the discovery in 1826 of natural gas rising in a spring.

**Bridge E222, Hartland Road Lift Bridge (CR 108)**

**Gasport Launch Site**
Telegraph Road
Gasport, NY 14067

**FACILITIES:** Concrete ramp, pavilion, limited parking.

**Gasport Marina**
8647 Telegraph Road
Gasport, NY 14067
(716) 772-2964

**FACILITIES:** Electric, water, restrooms. Picnic tables and grills in nearby park. Concrete ramp at western end. Ample free parking. Distance from parking about 20 feet.

Private Marina.
MIDDLEPORT

Middleport takes its name from its location on the Erie Canal halfway between Lockport and Newport, now known as Albion. Watch for the lift bridge, which best marks the village from the water. Although Middleport has good facilities for boaters, the high walls of the harbor make access from the canal difficult for paddlers. The closest launch is one mile east at the Middleport Launch Site.

Middleport Harbor/Middleport Park
Middleport, NY 14105
(716) 735-3303
middleport-newyork.com

FACILITIES: Electric, water, restrooms, showers. Tie up at the north terminal wall just before the lift bridge. Shops and restaurants are a short walk away.

PADDLING NOTE: Vertical walls line both sides of the canal through the center of Middleport, extending about 700 feet on either side of the lift bridge.

Bridge E216, Main Street Lift Bridge (NY 271)
**Middleport Launch Site**

Telegraph Road (NY 31E)
Middleport, NY 14105

**FACILITIES:** Picnic tables and pavilion. Concrete ramp, dock. Parking for 10 cars. Overnight parking permitted. Distance from parking about 20 feet. The ramp is about a quarter of a mile east of the guard gate.

---

**Bridge E211, Prospect Avenue Lift Bridge (NY 63)**

The canal widens and turns sharply southward east of the Prospect Avenue bridge. You are entering the Medina basin and aqueduct.

Both banks of the canal through Medina are lined with vertical walls from the Prospect Avenue lift bridge to the east side of the Horan Avenue/Bank Street bridge about 0.75 mile east. Paddlers may find the floating docks at the Canal Port Marina a bit high, but they are the only means of access/egress within the village.
The basin in Medina, with its L shape and straight lines, was built as part of the Barge Canal enlargement of 1905 through 1918. An aqueduct carries the canal about 70 feet above the Old Orchard Creek, which flows south to north and ends at Lake Ontario. This is the only aqueduct on the Barge Canal. The creek drops over Medina Falls just to the north of the canal, then runs into man-made Glenwood Lake.

The microclimate of the land between Lake Ontario and the Medina escarpment is ideal for growing apples and other fruit. If you are paddling here in the fall, you’re bound to see big trucks crossing the bridges, carrying crates of apples to cold storage warehouses in towns along the canal and railroad. You may spot pipes running down the canal bank. They are the intakes for siphons that carry water to the orchards and fields.

Medina sandstone was a popular 19th-century building material. Ranging in color from light tan to dark reddish brown, it was quarried in this area and shipped by canal to building sites from Buffalo to New York City and beyond. Architect H.H. Richardson used red Medina sandstone for his landmark Buffalo State Hospital (1871). Medina sandstone is in the towers of the Brooklyn Bridge, the New York State Capitol, Albany City Hall, hundreds of Brooklyn’s brownstones, and even a bit in Buckingham Palace, London. Even so, the densest concentration of Medina sandstone buildings may be here, close to the source. Look for it, in all its shades and colors, used in houses, churches, Main Street stores, municipal buildings, and cemeteries across western New York. You will also see broken pieces used for bank protection along this part of the canal.

Saint John’s Episcopal Church on Center Street is made of Medina sandstone. It’s listed in Ripley’s Believe It or Not as the “church in the middle of the street,” because Church Street splits to go around it.

**FACILITIES:** Municipal marina features floating docks with accessible paddlecraft launch and gangway, two water-level boarding platforms for paddlers, finger piers and 10 wet slips. Toilets and showers (call ahead for keypad.

Bridge E210, Eagle Street/Glenwood Avenue
To the east of the Glenwood Avenue/Eagle Street bridge, the canal opens into the large Medina basin.
code), electric, water, gazebo. Parking. Shops, restaurants, and attractions are a short walk from the marina.

**PADDLING NOTE:** Tall vertical walls line both sides of the channel through downtown Medina from the Prospect Street Lift Bridge in the west to the Horan Road bridge to the east. The low spillway of Medina Waste Weir and the subsurface intake for the Oak Orchard hydroelectric plant are in the south wall just east of Medina basin. The plant is small and intake velocities are low, but it's prudent for paddlers to stay mid-channel.

A ladder built into the western end of the north wall allows agile paddlers an opportunity to climb out and look over the rail for a view of Medina Falls.

**FACILITIES:** Concrete ramp, dock. Parking for 10 cars. Distance from parking about 20 feet.

**Bridge E202, Gaines Basin Road (CR 88)**
Courthouse Square is the focal point of Albion’s Courthouse Historic District. The 1858 Greek Revival county courthouse is topped by an impressive silver dome. The historic district contains 33 buildings, including many built of the local Medina sandstone; most date from the 1830s to 1910. Seven churches are within the district, representing the strong religious and political currents that swirled along the Erie Canal. The Presbyterian Church has a 175-foot tower and spire that can be seen 10 miles away. The Free Methodist Church is the mother church of this denomination, which grew out of the Abolitionist movement.

George Pullman (1831-1897) grew up in Albion watching the packet boats carry passengers along the Erie Canal. These boats had sleeping quarters made of stacked bunks, an idea that inspired Pullman in the 1860s to develop the Pullman sleeping car for railroads.

**PADDLING NOTE:** Albion’s vertical concrete walls line both sides of the canal for about a quarter mile through the center of town. The best place for paddlers to pull out if you want to explore the village is on the north bank near the trailhead kiosk, about 100 yards upstream (west) of the Main Street lift bridge.

The village is named for Myron Holley, one of the most influential of the early Erie Canal Commissioners who helped found the anti-slavery Liberty Party in 1840.

Originally, the Erie Canal swung well south, following the contour and crossing the Sandy Creek closer to the village center. During the 1840s enlargement canal builders built a tall embankment further down the valley (north) to eliminate the sharp bends of the “Holley Loop” and ease the passage of larger canal boats. Much of the low land between the original canal route and the embankment is now Holley Canal Park, complete with a waterfall formed by overflow water spilling from the canal. The park, which has picnic tables and restrooms, is a great place for paddlers to access the canal.

When the Erie Canal opened, Brockport grew into an important canal port and industrial center. McCormick reapers, which revolutionized agriculture, were manufactured here, starting in 1846. This historic legacy gives its name to Harvester Park. One of the seven toll stations on the Erie Canal was located at 1 Main Street. The highly ornamented building of Medina sandstone still stands.

Barge Canal construction in 1914-1915 widened the channel and replaced the fixed bridges with lift bridges, but did little to alter the center of the village. Today, the Historic Commercial District on both sides of Main Street is a vibrant pedestrian-friendly area of small shops and restaurants. The village hosts an annual Low Bridge High Water canal opening festival every May.

Spencerport is named for Daniel Spencer, whose farm was split by the Erie Canal. The village quickly grew up around the canal and thrived on canal transport. The downtown area contains dozens of architecturally distinguished buildings.

The Clyde W. Carter Memorial Gazebo on the south side of the canal, west of the lift bridge hosts an active schedule of concerts and events throughout the navigation season. Spencerport Canal Days are held at the end of July.

Spencerport has over 600 feet of docking facilities on both sides of the canal.

**South Greece Junction Lock**
Rochester grew from a collection of huts into a thriving city where the Erie Canal crossed the Genesee River. Today’s canal route arcs around the city in a deep vertical-walled cut through solid rock.

A temporary lock, built in 1917, allowed older canal boats to serve as docks on the west side of Rochester. It had a lift of three feet and was active from 1918 into the 1920s. It’s now derelict, but look for remnants of the old concrete walls and reproduction wooden lock gates. A nearby kiosk has historical information.
