

Seneca Lake Survey Educator Resources

ACKNOWLEDGMENTS

The Seneca Lake Survey Educator Resources are a set of four lesson plans based on the findings detailed in the Seneca Lake Archaeological & Bathymetric Survey, 2019 Final Report by Art Cohn (Principal Investigator) and Dr. Tom Manley (Chief Scientist). These resources connect research from the Seneca Lake Survey to New York State Education Standards in Science, Social Studies, and English Language Arts for grades 6-8. The lessons combine teacher instructions, original source documents, and images with student worksheets to engage students learning about underwater archeology, bathymetry, invasive species, and water quality.

The Educator Resources were planned, developed, and distributed by New York State Canal Corporation and Erie Canalway National Heritage Corridor.

Curriculum Development Team:

- Melanie Bowman (Phelps-Clifton Springs Central School District)
- Donna Wright Mosher (South Seneca Central School District)
- Kathleen O'Dea (Pittsford Schools)
- Patrick Stenshorn (Erie Canalway National Heritage Corridor)

Major contributions provided by Art Cohn, Principal Investigator for the Seneca Lake Archaeological & Bathymetric Survey, including research material, images, and other resources.

Special thanks to the following for providing images and reading materials:

- Canal Society of New York State
- City of Hamilton, Ontario
- Dennis Gerber and Tim Caza
- Finger Lakes Institute at Hobart and William Smith Colleges
- Historic Geneva
- Lake Champlain Maritime Museum
- National Oceanic and Atmospheric Administration
- New York State Department of Environmental Conservation
- New York State Office of Parks, Recreation, and Historic Preservation
- Paleontological Research Institution
- Sampson Memorial Naval & Air Force Museum
